

Attorney Docket No.: FMCE-P078

Claim Amendments:

1(currently amended): A debris cap for a subsea xmas tree or wellhead, comprising:

a container that is pre-charged with at least one of a corrosion inhibitor and/or a biocide prior to installation of the debris cap on the xmas tree or wellhead subsea;

wherein after installation the debris cap is supported on the xmas tree or wellhead; and

wherein the at least one of the corrosion inhibitor and/or the biocide is released into a stagnant volume enclosed beneath the debris cap following installation on the ~~subsea~~ xmas tree or wellhead.

2(original): A debris cap as defined in claim 1, wherein the debris cap is frictionally retained on the tree or wellhead without the use of a lockdown mechanism.

3(original): A debris cap as defined in claim 1, further comprising an O ring environmental seal which engages the xmas tree or wellhead.

4(original): A debris cap as defined in claim 1, wherein the corrosion inhibitor and/or the biocide comprises a solid block and the debris cap further comprises a perforated container for holding the solid block.

5(original): A debris cap as defined in claim 1, wherein the corrosion inhibitor and/or the biocide comprises a solid block and the debris cap further comprises a wire basket for holding the solid block.

Attorney Docket No.: FMCE-P078

6(original): A debris cap as defined in claim 1, further comprising at least one finger for frictionally gripping the xmas tree or wellhead.

7(original): A debris cap as defined in claim 1, further comprising a valve for allowing water displacement during installation or retrieval of the debris cap.

8(original): A debris cap as defined in claim 1, further comprising a central boss and a surrounding hood.

9(original): A debris cap as defined in claim 1, wherein the debris cap is molded from a plastic material.
